Powergorilla

Product Name: Powergorilla

Manufacturer: -

Model Number: TGS1061

The powergorilla will give you an extra 2-5 hours of power, depending on your laptop's specification, and over 20 hours on various other electronic devices.

Powergorilla will work with devices up to 24volts - so from your laptop, right the way down to your mobile phone or iPod. Just select which voltage you require; 5v, 16v, 19v or 24v and the LCD screen will indicate which setting has been chosen. Then simply hook up your gadget and away you go! You can even daisy-chain, so whilst the powergorilla is charging your laptop, you can charge the powergorilla from the mains power supply. Or you can charge your laptop and your mobile phone simultaneously!

One-touch button technology means the powergorilla is easy to use and its sleek, aluminium casing with shock resistant rubber protection strips makes it totally robust. Powergorilla also has many safety features including output auto-lock, voltage limitation protection, short circuit protection, over charging protection and over heat protection.

The Powergorilla has also been on field tests out in Afghanistan. Being subjected to extremely hot temperatures, the powergorilla has successfully charged a Dell laptop without fault.

Make the most of this range of convergent technology - the Powertraveller can be charged by the Solargorilla (available separately here) - making them absolute travel essentials!

Kit includes:

- * neoprene travel case
- * tip pack containing 8 male and 7 female laptop connectors
- * tip pack containing connectors for most small devices - 12v car charger socket
- * universal AC laptop charger
- * Lightweight (631g), portable (220 x 130 x 15mm) and tough, powergorilla really does let you ROAM WILD...
