

JF1 MiniCart

Product Name: JF1 MiniCart

Manufacturer: -

Model Number: pgg084

Really made for kids up to 14 years old, this electric gokart has a unique 'lean to steer' design which removes the need for a steering wheel, you simply lean your body left or right to steer it. With a 24v/250W motor with a chain drive to rear axle, it has a running time of about 1 hour, a speed of about 15Km/h, and a recharge time of about 4 hours. The chassis is made of steel and it has a push-button accelerator on the right handle and a brake on the left. Possibly the funkiest and most original go-kart around, the JF1 is recommended for 6 year olds upwards, with an upper weight limit of 50 kilos, although we've tested it and it seemed to hold up fine, despite some of us weighing WELL over 50kg. Any kid who gets to play on this should be sufficiently grateful to keep their parents in the lap of luxury in their old age. Features: mini Cart with unique tilting seat 'lean to turn' system, handlebars: push button accelerator on right hand and brake lever on left hand, steel chassis with moulded seat and rear wing, 25 cm rubber wheels, 24v / 250W motor with chain drive to rear axle, speed up to 15Km/h, recharge time 4 hours, running time approx. 1 hour, 2 Batteries x 12v (24v total, sealed), charger - 29v at 1.5A from 230v mains supply, max rider weight: approx. 50Kg, suitable for ages 6- 14 (weight dependant), size: 115cm x 70.5cm x 50.5cm, delivery in 5 working days.

Price: R4,830.00
