Enjoy the wonders and mysteries of electro-magnetism with our new Stellanova Magnetic Levitating Globe. Pass your hand above, below and around the sphere as it continues to float - touching only air! Magical design displays continual levitation. Enjoy the wonders and mysteries of electro-magnetism with our new Stellanova Magnetic Levitating Globe. Pass your hand above, below and around the sphere as it continues to float - touching only air! Magical design displays continual levitation. The beautiful globes features Computer Controlled Levitation (CCL). A magnetic field sensor constantly measures the height at which the globe is suspended. The sensor and the microcomputer in the base control an electronic magnet in the upper arm that adjusts the height of the globe automatically. The unit are 20 - 30cm tall and globe is 10 - 20cm in diameter. The cushioned bottom protects surfaces and the unit includes an AC-powered pack with cord. Base is metal, globe is plastic and magnet is metal. This is very cool! Makes a terrific gift for the home or office. Buy yours now!
